### Overview

It is now more important than ever, to ensure your BSA program and the risk appetite of your financial institution can absorb any challenges presented. Statutory and regulatory requirements remain, and financial institutions need to be aware of the new threats presented to banks and the customers they serve. Legislators and the Treasury Department continue to rely upon financial institutions to assist law enforcement in the battle against money laundering and other financial crimes.

What should BSA/AML training encompass? Current events and recent changes? How current events shape your bank's risk assessment? How the headlines drive your priorities? Expectations from auditors, examiners, and management and how your program should measure up? This seminar delivers on all these and more.

Facilitated by Keith E. Monson, CRCM, CERP, this interactive seminar represents our seminal, traditional BSA/AML event, held annually to update, expand, and enhance the education of BSA/AML compliance professionals. There is risky business out there, and this program is directed at the essence of these risks. Are your credentials adequate for overseeing the BSA/AML function at your bank? As the BSA bar continues to be raised, so do expectations — from your board, management, auditors and examiners. This full-day, comprehensive program, applies a “practitioner’s” approach to critical thinking and compliance management. It promises to meet and exceed the expectations for mandatory training under the Bank Secrecy Act and USA PATRIOT Act.
